Objective

Hello, my name is Mahmoud. I work as a Frontend Developer (**React Js**) . I have experience in the field of user interface development. I also have experience in nodejs, Express js and mongodb, and I have created several mern-stack projects. I will leave them for you in the projects section.

Work Experience

1- Web Developer At Codsoft

Date:- 09/2023 - 10/202

Achievements/Tasks:-

- Responsible for converting UI UX designs into code using html, css, javascript, react js
- Creating databases using mongodb and creating an API and then connecting them to the frontend

2- Graduation Project

Date:- 05/2023 - 07/2023

Achievements/Tasks:-

- Responsible for converting UI UX designs into code using html, css, javascript, react js
- This was my graduation project from the Faculty of Computing, Sohag University, Information Technology Department. It is a website for booking tickets online. I implemented the entire website on my own. I used REACT.JS, MATERIAL-UI, and some other libraries in Frontend, Node.js, and Express.js. and MongoDB in Backen
- **Appreciation :** Excellence

Link Project

Education

Sohag University

Date: (10/2019 - 07/2023)

Bachelor's degree in the College of Computers and Artificial Intelligence

Information Technology Department

Appreciation :very good

Projects

1. BOOKING (04/2023 - 06/2023)

- This was my graduation project from the Faculty of Computing, Sohag University, Information Technology Department. It is a website for booking tickets online. I implemented the entire website on my own. I used REACT.JS, MATERIAL-UI, and some other libraries in Frontend, Node.js, and Express.js. and MongoDB in Backend
- Live Project : **Booking-Bus**

2. Online Quizzes (09/2023 - 09/2023)

- This project is an examination exam where the user can add an exam and then another user browses it and takes this exam or he chooses an exam and starts solving it to test himself.
- On this site I use React JS, Node js, Express Js, Mongoddb, and I also use nodemailer to send a confirmation code for creating an account to the user.
- Live Project : **Quizzes**

3. Foody (08/2021/08/2021)

- In this project, I applied what I learned in react js and react-router-dom, and this was my first project using react.
- Live Project : **Foody**

4. Quran (06/2022 - 06/2022)

- I created this site to provide listening service for the most famous Quran reciters, I used react.js, bootstrap, javascript and other libraries
- Live Project: **Quran**

5. Azkary (10/2022- 10/2022)

- I created this project to include all the supplications such as morning, evening, sleep, and many others. I created a rosary page and also a page for listening to the Holy **Quran**.
- **Live Project:** [Azkary](#)

6. Millionaire (01/2023 - 01/2023)

- This site is a game of Who Wants to Be a Millionaire? You will like it, God willing, I made this game who wins a million using react js , bootstrap and json server
- **Live Project:** [Millionaire](#)

Skills' Summary
