   and express to connect with the front end.

Education

SOHAG UNIVERSITY - (IT)   2019-2023

- Bachelor's Degree in Computers and Artificial Intelligence
- Department: Information Technology
- Grade:very good

Projects

1.   **Watch Store (under prepare)**

An e-commerce website for watch sales built with Next.js (App Router) and Redux for state management, using TypeScript for reliability. Integrated Cloudinary for image hosting, Stripe for payments and other option, and next-intl for multilingual support. Developed an advanced control panel for managing users, orders, products, and categories, along with user-specific search history and cart handling on the front end. You can see from **here**

2- El-Barka Market

An e-commerce website for vegetable and fruits product sales built with Next.js (App Router) and zustand for state management, using TypeScript for reliability. Integrated Cloudinary for image hosting, Stripe for payments, and other option. Developed an advanced control panel for managing users, orders, products, and categories, etc You can see from **here**

3- Tazkarty

My graduate project

Developed a full-featured ticket booking website independently using the MERN stack (React.js, MUI, Node.js, Express.js, and MongoDB). Managed all phases of development, from front-end design to back-end setup, ensuring seamless user interactions and secure data handling. You can see from **here**

Skills & abilities

HTML/HTML5 - CSS/CSS3/SASS **-** JavaScript/ES6 **-** Redux **-** React.js **-** Next.js - TypeScript
Node.js   Express.js - MongoDB - Material UI - Tailwind CSS - Bootstrap - Axios - Formik - Agile methodologies - React Query

Soft Skills

Solving problems - Communication skills - Team work - creativity and innovation - Planning and organizing - Quick learning.
